#### What are the key risks that are specific to the Issuer?

##### **Risk exposure to debt securities issued by sovereign States**

The market tensions regarding government bonds and their volatility, as well as Italy's rating downgrading or the forecast that such downgrading may occur, might have negative effects on the assets, the economic and/or financial situation, the operational results and the perspectives of the

The financial information indicated as "not available" has not been inserted in the 30 July 2025 Press Release.

Bank. Intesa Sanpaolo Group results are and will be exposed to sovereign debtors, in particular to the Republic of Italy and certain major European Countries.

#### ***Risks related to legal proceedings***

The breakdown according to the main categories of disputes with likely risk shows the prevalence of cases related to the Intesa Sanpaolo Group's ordinary banking and credit activities, involving claims relating to banking and investment products and services or on credit positions and revocatory actions. The remaining disputes mainly consist of other civil and administrative proceedings and labour disputes or criminal proceedings or proceedings related to operational violations.

#### ***Risks related to the economic/financial crisis and the impact of current uncertainties of the macro-economic context***

The future development in the macro-economic context may be considered as a risk as it may produce negative effects and trends in the economic and financial situation of the Bank and/or the Intesa Sanpaolo Group. Any negative variations of the factors that affect the macro-economic framework, in particular during periods of economic-financial crisis, could lead the Bank and/or the Intesa Sanpaolo Group to suffer losses, increases of financing costs, and reductions of the value of the assets held, with a potentially negative impact on the liquidity of the Bank and/or the Intesa Sanpaolo Group and its financial soundness.

#### ***Credit risk***

The economic and financial activity and soundness of the Bank depend on its borrower's creditworthiness. The Bank is exposed to the traditional risks related to credit activity. Therefore, the clients' breach of the agreements entered into and of their underlying obligations, or any lack of information or incorrect information provided by them as to their respective financial and credit position, could have negative effects on the economic and/or financial situation of the Bank.

#### ***Market risk***

The market risk is the risk of losses in the value of financial instruments, including the securities of sovereign States held by the Bank, due to the movements of market variables (by way of example and without limitation, interest rates, prices of securities, exchange rates), which could determine a deterioration of the financial soundness of the Bank and/or the Intesa Sanpaolo Group. Such deterioration could be produced either by negative effects on the income statement deriving from positions held for trading purposes, or from negative changes in the FVOCI (Fair Value through Other Comprehensive Income) reserve, generated by positions classified as financial activities evaluated at fair value, with an impact on the overall profitability.

#### ***Liquidity risk of Intesa Sanpaolo***

Although the Bank constantly monitors its own liquidity risk, any negative development of the market situation and the general economic context and/or creditworthiness of the Bank, may have negative effects on the activities and the economic and/or financial situation of the Bank and the Intesa Sanpaolo Group. In particular, in light of the findings set forth in the EBA third report on LCR and NSFR monitoring<sup>7</sup>, the Issuer remains attentive to the evolution of the funding market to ensure that its ordinary refinancing strategies and normal business are not affected by the cumulative effect of the maturity of all the remaining central bank funding and additional outflows due to the impact of adverse market liquidity scenarios. The liquidity risk is the risk that the Bank is not able to satisfy its payment obligations at maturity, both due to the inability to raise funds on the market (funding liquidity risk) and of the difficulty to disinvest its own assets (market liquidity risk).

#### ***Operational risk***

The Bank is exposed to several categories of operational risk which are intrinsic to its business, among which are those mentioned herein, by way of example and without limitation: frauds by external persons, frauds or losses arising from the unfaithfulness of the employees and/or breach of control procedures, operational errors, defects or malfunctions of computer or telecommunication systems, computer virus attacks, default of suppliers with respect to their contractual obligations, terrorist attacks and natural disasters. The occurrence of one or more of said risks may have significant negative effects on the business, the operational results and the economic and financial situation of the Bank.

#### ***Risk related to the development of the banking sector regulation and the changes in the regulation on the solution of banking crises***

The Bank is subject to a complex and strict regulation, as well as to the supervisory activity performed by the relevant institutions (in particular, the ECB, the Bank of Italy and CONSOB). Both the aforementioned regulation and supervisory activity are subject, respectively, to continuous updates and practice developments. Furthermore, as a listed Bank, the Bank is required to comply with further provisions issued by CONSOB. The Bank, besides the supranational and national rules and the primary or regulatory rules of the financial and banking sector, is also subject to specific rules on anti-money laundering, usury and consumer protection. Although the Bank undertakes to comply with the set of rules and regulations, any changes of the rules and/or changes of the interpretation and/or implementation of the same by the competent authorities could give rise to new burdens and obligations for the Bank, with possible negative impacts on the operational results and the economic and financial situation of the Bank.

<b>Seniority of the Securities</b>
The Certificates constitute direct, unsubordinated, unconditional and unsecured obligations of the Issuer and, unless provided otherwise by law, rank <i>pari passu</i> among themselves and (save for certain obligations required to be preferred by law) rank equally with all other unsecured obligations (other than subordinated obligations, if any) of the Issuer from time to time outstanding.
<b>Restrictions on the free transferability</b>
The Securities will be freely transferable, subject to the offering and selling restrictions in the United States, the European Economic Area under the Prospectus Regulation and the laws of any jurisdiction in which the relevant Securities are offered or sold.
<b>Where will the Securities be traded?</b>
Application will be made for the Securities to be admitted to trading on the Italian multilateral trading facility SeDeX, organised and managed by Borsa Italiana S.p.A., which is not a regulated market for the purposes of Directive 2014/65/EU as amended, with effect from the Issue Date or a date around the Issue Date.
After the Issue Date, application may be made to list the Securities on other stock exchanges or regulated markets or to admit to trading on other trading venues as the Issuer may decide.
<b>What are the key risks that are specific to the Securities?</b>
<p><b><i>The Certificates may not be a suitable investment for all investors</i></b></p> <p>Certificates are complex financial instruments. A potential investor should not invest in Certificates which are complex financial instruments unless it has the expertise (either alone or with the help of a financial adviser) to evaluate how the Certificates will perform under changing conditions, the resulting effects on the value of the Certificates and the impact this investment will have on the potential investor's overall investment portfolio.</p>
<p><b><i>General risks and risks relating to the Underlying</i></b></p> <p>The Securities involve a high degree of risk, which may include, among others, interest rate, foreign exchange, time value and political risks. Purchasers should be prepared to sustain a partial loss of the purchase price of their Securities. Fluctuations in the value of the relevant Underlying will affect the value of the Securities.</p>
<p><b><i>Risk arising from the Benchmark Regulation</i></b></p> <p>The Underlying may qualify as a benchmark (the "<b>Benchmark</b>") within the meaning of Regulation (EU) 2016/1011 of the European Parliament and of the Council dated 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014 (the "<b>Benchmark Regulation</b>"). Any changes to a Benchmark as a result of the Benchmark Regulation could have a material adverse effect on the costs of refinancing a Benchmark or the costs and risks of administering or otherwise participating in the setting of a Benchmark and complying with the Benchmark Regulation. Such factors may have the following effects on certain Benchmarks: (i) discourage market participants from continuing to administer or contribute to such Benchmark; (ii) trigger changes in the rules or methodologies used in the Benchmarks; or (iii) lead to the disappearance of the Benchmark. Any of the above changes or any other consequential changes as a result of international, national or other proposal for reform or other initiatives or investigations, could have a material adverse effect on the value of and the amount payable under the Securities. The potential elimination of a Benchmark, or changes in the manner of administration of such Benchmark, as a result of the Benchmark Regulation or otherwise, could require an adjustment to the terms and conditions, or result in other consequences. These reforms and changes may cause a Benchmark to perform differently than it has done in the past or be discontinued. The application of the fallback methods may expose investors to certain risks including, but not limited to (i) conflicts of interest of the Calculation Agent when making the required adjustments to the Securities, or (ii) the replacement of the Underlying with a different Underlying which could perform differently than the original Underlying and therefore affect amounts payable in respect of the Securities, or (iii) the early redemption of the Securities. Investors should be aware that they face the risk that any changes to the relevant Benchmark may have a material adverse effect on the value of and the amount payable under the Securities.</p>
<p><b><i>Certain considerations associated with Securities providing for the application of a cap</i></b></p> <p>The Securities provide for the application of a maximum return payable to investors. Therefore, the amounts payable to investors will be subject to such predetermined maximum.</p>
<p><b><i>Impact of implicit fees on the Issue Price/Offer Price</i></b></p> <p>Investors should note that implicit fees (e.g. placement commissions/distribution commissions, structuring fees) may be a component of the Issue Price/Offer Price of the Securities, but such fees will not be taken into account for the purposes of determining the price of the relevant Securities in the secondary market. Investors should also take into consideration that if Securities are sold on the secondary market immediately following the offer period relating to such Securities, the implicit fees included in the Issue Price/Offer Price on initial subscription for such Securities will be deducted from the price at which such Securities may be sold in the secondary market.</p>
<p><b><i>Possible illiquidity of the Securities in the secondary market</i></b></p> <p>It is not possible to predict the price at which Securities will trade in the secondary market or whether such market will be liquid or illiquid. The Issuer, or any of its Affiliates may, but is not obliged to, at any time purchase Securities at any price in the open market or by tender or private treaty. Any Securities so purchased may be held or resold or surrendered for cancellation. The Issuer or any of its Affiliates may, but is not obliged to, be a market-maker for an issue of Securities. Even if the Issuer or such other entity is a market-maker for an issue of Securities, the secondary market for such Securities may be limited. To the extent that an issue of Securities becomes illiquid, an investor may have to wait until the Exercise Date to realise value.</p>

## Section 4 – Key information on the offer of Securities to the public

### Under which conditions and timetable can I invest in this Security?

#### General terms, conditions and expected timetable of the offer

**Non-exempt Offer Jurisdiction(s):** Italy

**Maximum number of Securities offered:** 100,000

**Offer Price:** EUR 1,000

**Offer Period:** in respect of sales by means of financial advisors authorised to make off-premises offers (*consulenti finanziari abilitati all'offerta fuori sede*) only, from 13 January 2026 to and including 16 February 2026, or, in respect of sales by means of distance communication techniques only, from 13 January 2026 to and including 9 February 2026 (the “Offer Period”).

**Conditions to which the offer is subject:** The offer of the Securities is conditional on their issue and on the release by Borsa Italiana S.p.A., or by other trading venues, before the Issue Date, of the relevant authorisation to the admission to trading of the Securities.

**Terms of the Offer:** This issue of Securities is being offered in a Non-Exempt Offer in Italy pursuant to Articles 24 and 25 of the Prospectus Regulation. The Securities will be distributed by way of public placement and the placement activities will be carried out by the Manager.

The Issuer reserves the right, in its sole discretion, to close the Offer Period early, also in circumstances where purchases of Securities are not yet equal to the maximum amount offered of 100,000 Securities. Notice of the early closure of the Offer Period will be given by the Issuer by publication on the websites of the Issuer and the Manager. The early closure of the Offer will become effective from the date specified in such notice. The Issuer reserves the right to postpone the closure of the Offer Period, in order to extend the Offer Period. Notice of the postponement of the closure of the Offer Period will be given by the Issuer by publication on the websites of the Issuer and the Manager. The Issuer reserves the right to increase, during the Offer Period, the maximum amount of Securities offered. The Issuer shall forthwith give notice of any such increase by publication of a notice on the websites of the Issuer and the Manager. The Issuer reserves the right, in its sole discretion, to revoke or withdraw the Offer and the issue of the Securities at any time prior to the Issue Date. Notice of revocation/withdrawal of the Offer will be given by publication of such notice on the websites of the Issuer and the Manager. Revocation/withdrawal of the Offer will be effective upon publication. Upon revocation/withdrawal of the Offer, all subscription applications will become void and of no effect, without further notice.

**Minimum and maximum subscription amount:** The Securities may be subscribed in a minimum lot of no. 1 Security and an integral number of Securities higher than such amount and being an integral multiple of 1. There is no maximum amount of application within the maximum number of Securities offered of 100,000 Securities.

**Expenses charged to the investor by the issuer or the offeror:** The Offer Price embeds:

- placement commissions payable to the Manager, whose expected amount, on the basis of the market conditions existing prior to the beginning of the Offer Period, is equal to 2.61% of the Issue Price. The definitive amount of such placement commissions may be higher or lower than the expected amount, but in any case it will never be higher than 3.00% of the Issue Price; and
- other structuring costs payable to the Issuer equal to 0.30% of the Issue Price.

Notice of the definitive amount of the placement commissions will be published on the website of the Issuer within 5 (five) days following the Issue Date.

### Who is the offeror?

**Fideuram - Intesa Sanpaolo Private Banking S.p.A.**, with registered office at Piazza San Carlo 156, 10121 Turin, Italy (the “Manager”).

### Reasons for the offer and estimated net amount of the proceeds

The Issuer intends to use the net proceeds from each issue of Certificates for general corporate purposes, including making a profit. A substantial portion of the proceeds may be used to hedge market risks with respect to the Certificates.

The net proceeds (resulting from subtracting the commissions and the costs referred to above, from the aggregate Issue Price paid by the Securityholders) of the issue of the Securities will be equal to EUR 96,700,000 (assuming placement commissions referred to above will be 3.00% of the Issue Price in respect of all Securities placed).

### Indication of whether the offer is subject to an underwriting agreement on a firm commitment basis

The Issuer and the Manager have agreed under a placement agreement (the “Placement Agreement”) that the Manager will place the Securities without a firm commitment. The Placement Agreement will be dated on or about 12 January 2026.

The Issuer will act as lead manager of the placement (*Responsabile del Collocamento* as defined under article 93-bis of the Legislative Decree of 24 February 1998, n. 58, as subsequently amended) but will not act as manager and, accordingly, will not place any Securities to the public in Italy.

### Indication of the most material conflicts of interest pertaining to the offer or the admission to trading

Intesa Sanpaolo S.p.A., the issuer of the Securities, is part of the Intesa Sanpaolo group, to which the Manager belongs, therefore participation relationships of the Manager with the Issuer result in a conflict of interest.

The Issuer may enter into hedging arrangements with market counterparties in connection with the issue of the Securities in order to hedge its exposure.

The Issuer will act as Calculation Agent under the Securities.

In addition, the Issuer may act as liquidity provider (as defined under the rules of the relevant market, as amended from time to time) in respect of the Securities.

Save as discussed above and save for any commission payable to the Manager and costs payable to the Issuer referred to above, so far as the Issuer is aware, no person involved in the issue of the Securities has an interest material to the Offer.
